## APPENDIX A

Once sails are removed and rolled, competitors must do the following in order:

- 1) Attach the jib halyard to the loop in the bowline and rake the mast forward (just as you would when you raise your jib in heavy air). Sidestays should be completely tight.
- 2) Remove tennis ball(s) and loop the elastic of the tennis ball(s) over the rudder pintle(s) so the balls do not dangle in the water.

- 3) Lay rudder parallel to the stern inside the back of the boat, with rudder head on the bottom of the boat and rudder blade pointing towards the sailing center.

- 4) Tie the boat down. For 420s, slide cradle strap through the jib lead and secure through jib cleat (just as you would with the jib sheet while sailing upwind). For FJs, slide the cradle strap through the eye below the chainplate, tighten, and secure with a double hitch.
